Dogwood Canyon Audubon Center is excited to offer an eight-week series of homeschool science classes this Fall!

Winged Wonders: All About Birds

98.5% of all migratory bird species in the United States are found right here in Texas. We have an amazing home! Join us as we explore our role in the Central Flyway, the primary migration route for hundreds of bird species. Students will benefit from the expertise of Audubon educators, enjoy outdoor adventures, and gain practical science experience as they investigate the world of birds, including their fascinating physical traits and interactions within the local North Texas ecosystem.

This all-encompassing course will teach and reinforce science concepts such as adaptations, biodiversity, ecosystem, energy flow, food chain, food web, habitat, interdependence, life cycle, predator/prey, and conservation.

- **Dates:** Tuesdays, September 18 – November 6, 2012
- **Time:** 2:30-4:30pm
- **Place:** Dogwood Canyon Audubon Center at Cedar Hill
- **Fee:** \$125 per student (\$100, DCAC members)
- **Ages:** Recommended for 7-12 year old students

Register today! Contact Marti Copeland, Education Manager, at 469-526-1988 or mcopeland@audubon.org for registration information.
